

USB-PD TRIGGER MODULE

COM-ZY12PDN

With this small module, you can trigger USB-PD protocols and thus, for example, charge your laptop via a PD-capable USB-C power supply. The output voltage can be adjusted in 5 steps (5 V, 9 V, 12 V, 15 V and 20 V) via the button integrated on the module. The currently selected voltage can be read from the colour of the RGB LED integrated on the module. The module can be used flexibly and is highly integrable.

MAIN FEATURES

Output voltage	5 V / 9 V / 12 V / 15 V / 20 V (adjustable via button)
Supply voltage	(up to 20 V / 100 W) USB-PD-capable power supply (not included)
Output current	5 A max.
Output power	100 W max.
Input interface	USB-C
Output interface	Solder pads for USB-A and screw terminal connection

FURTHER SPECIFICATIONS

Special features	Adjustable output voltage, flexible output interface
Dimension	31 x 15 x 4 mm
Items delivered	COM-ZY12PDN module
