Joy-IT® StromPi2

The StromPi 2 expansion board is a redevelopment of the popular

Joy-IT Power Solution. Not only the voltage range was increased to 6V-61V, for example for using with larger / more batteries or power supplies, the StromPi 2 board now also delivers up to 3A current to supply even larger projects with enough power.

Also now there is a reset function for the Raspberry Pi included, which consequential expands the UPS function of the StromPi 2.

Due to the new super-slim design, the StromPi2 fits into many enclosures and new applications.

Technical Specifications

Model	Joy-IT StromPi 2
Article No.	RB-StromPi2
DC Input	Main: Micro-USB, Wide-Range: 6V-61V
DC Output	5V, 3A / RPi PinHeader + USB
Features	Wide-Range, USV-Modus, Reset-Function, Ultra-Slim Build, looped through Pin-Header
Compatible To	Raspberry Pi 3, 2B, B+, A+, M2 Via USB-Output: Many more single board computers
Scope of Delivery	StromPi 2
EAN	4250236811925
