

INFRARED SENSOR

Infrared distance sensor

This infrared distance sensor can measure distances up to 80cm fast and reliably. The reaction time is about 39 milliseconds.

MAIN FEATURES

Measuring range	10 cm - 80 cm
Reaction time	39 ms
Compatible with	Raspberry Pi, Arduino and other SBCs
Dimensions	29,5 x 13 x 13,5 mm
Items included	Infrared distance sensor

FURTHER SPECIFICATIONS

Supply voltage	4,5 V - 5,5 V
Current consumption	Typ. 30 mA
Operating temperature	-10 to 60 °C
