

HALL MAGNETIC FIELD SENSOR

Magnetic field sensor with digital output

With this small Hall magnetic field sensor, you can detect magnetic fields using the sensor's digital output and the integrated status LED. When the sensor is held in a magnetic field, the LED lights up and the sensor output switches to low state.

MAIN FEATURES

Supply voltage	4,5 - 24 V
Chip set	A3144
Logic	Active-low
Special features	Integrated status led

FURTHER SPECIFICATIONS

Compatible with	Raspberry Pi, Arduino, etc.
Colour	Black
Dimensions	30 x 15 x 7 mm
Items delivered	Hall magnetic field sensor

FURTHER DETAILS

Article No.	SEN-KY003HMS
EAN:	4250236816784
Customs Tariff No.	8473302000
