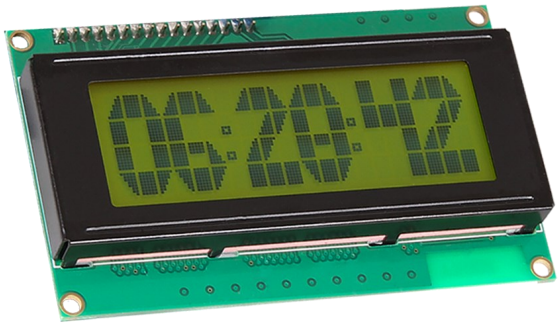
20X4 LCD MODULE

20x4 LCD module with 16 pole Pin-Header



This 20x4 character LCD is best suited for your project.

It works with the common HD44780 controller chip and has a green backlight.

It has a 16 pin connector and can be used as a built-in or a plug-on display.

In the scope of supply, there is a corresponding solderable solderable pin header.

It is also compatible with the EXP500 experimental board.
