

ALUMINUM HOUSING

FOR RASPBERRY PI

JOY-IT

SPECIAL FEATURES

- ✓ Robust aluminum housing
- ✓ Passive cooling through ventilation holes
- ✓ Wall bracket included
- ✓ Maximum compatibility for Raspberry Pi B+, 2B, 3B & 3B+
- ✓ Space-optimized design for a wide range of applications

The RB-Alucase+06 aluminum case was specially developed for professional use with the Raspberry Pi model B+, 2B, 3B and 3B+ and combines reliable protection with a functional design. Made of robust aluminum, the case offers durable and effective shielding against mechanical influences and electromagnetic interference - ideal for industrial environments, laboratories or demanding development applications.

The integrated ventilation holes on the top ensure reliable passive cooling and thus contribute to long-term operational reliability and system stability. The supplied wall bracket allows the enclosure to be mounted flexibly and in a space-saving manner, making it easy to integrate into existing installations.

With its compact dimensions of 60 x 32 x 95 mm and the high-quality black powder coating, the RB-Alucase+06 is not only functional, but also visually designed for professional applications. In addition to the aluminum housing, the scope of delivery includes all the necessary screws and the wall bracket - for immediate and uncomplicated commissioning.
