

5 MP CAMERA FOR RASPBERRY PI

rb-camera_JT

This camera module is for all Raspberry models and works with the familiar OV5647 chip. It provides good images with 5MP quality.

Moreover, you have the possibility to provide additional modules (for example lighting) via an own power supply with up to 3.3V.

Through an own bracket on the board, it is possible to install the camera individually or to mount more expansions.
